allows users to create a new trip by specifying a trip name, destination, and	
new trip by specifying a trip name, destination, and	
name, destination, and	
4 dates. 2 I1 I	
View Trip List: Allows users	
to view a list of all their	
5 created/planned trips 2 1	
Delete Trip: Users are able	
to delete a trip from their	
6 account. 2 3	
3	
Google Maps Integration:	
The system shall display a	
map using Google Maps	
API, allowing users to	
search for locations and	
7 landmarks. 3	
1 1 ==	-> 2
Add activity to Itinerary: users can add activities to	
their itinerary by selecting a	
location and entering	
8 activity details (name, time) 3 1	
View Itinerary: users can	:> T
view a day-by-day itinerary,	
showing scheduled	
9 activities 3 2	
Edit Activity: users can	
edit activity details in the	
10 itinerary 5 3	

	Doloto Activity: System			2
	Delete Activity : System allows users to			~
	delete/cancel an activity in			
11	the itinerary	5	3	
111	Expense Log: users can	<u> </u>		3
	log expenses under a trip			
12	and categorize them	5	3	
12	and categorize them	5		3
	View Expense Summary:			
	user can view a summary			
	of their expenses broken			
13	down by category	8	3	
10	Export Itinerary: Users	J		4
	can export their entire trip			
	itinerary and expenses as			
14	PDF	8	4	
	Share Trip: users can			4
	share their trip details with			
	others via a link or email			
15	invite	8	4	
	User Collaboration:			4
	multiple users can			
	collaborate on a trip and			
16	edit the itinerary	13	4	
	allows authenticated users			4
	to access and modify			
17	shared trips	5	2	
	Responsiveness: system			2
	will have smooth UI			
	experience with little to no			
18	lagging	13	2	
	Link Maps to Trip			4
	Location: Within the			
	google maps API, users			
	can link a location to their			
19	trip location		4	
				3
